Course Description

This course covers strategic Business skills and important laws regulating contractors, inspectors, engineers, and tradesmen.

Expectations and Goals

At the end of this course the student will understand all the factors to run an electrical business safely and successfully. Important regulations and enforcement of Workers Compensation including claims, audits, regulations, and situations for business. They will review NFPA70e Safety to ensure they and team are following standards provided for safe electrical workplaces. Understand and review important State Rules, laws, and relevant codes that will impact their license and electrical business. Students will learn skills to successfully run an electrical business in today's market, stay ahead of the industry changes, and improve their everyday decisions with business goals in mind. They will leave prepared to manage the business or themselves in the times that have caused many others to fail.

Class Attendance Verification and Evaluation

Students' attendance is monitored with sign-in and sign-out sheets that verify actual time spent in the course. Students will also complete a course evaluation form for the course content and the instructor.

- a. **The students' sign in form will be stamped by our check-in staff.**
- b. At the end of the class, the sign in forms are picked up by our staff. The students are handing them to us before they exit the class.
- c. In order to receive credit for the course, the sign in form must have signed in and out and must be stamped and must match the identification verified on the order.

Students will be provided an instructor and course evaluation during the class. We will collect and review each evaluation. Evaluation sheet attached following syllabus.
