

## **Training Workshop Outline**

---

**Training Program Name:** Five Utah Energy Code Compliance Options

**Training Workshop Name:** Implementing the Energy Code

**Training Workshop Short Description:** This course will give contractors a good understanding of the energy code requirements for new homes and multifamily units, as well as provide instruction on ways to meet those requirements.

**Training Workshop Contact:** Shawn Bodily [Shawn.Bodily@airlockutah.com](mailto:Shawn.Bodily@airlockutah.com)  
(801) 382-9796

**Work Shop Hours:** 1

**List Training Course Outcomes and an example of assessment for each:**

**As a result of this training, students will be able to**

1. Identify key terms used by the Energy Code and Building Officials so contractors have a better understanding of what is required.
2. Understand what each compliance test (blower door and duct blaster) is testing and when each test is required.
3. Understand common problems and failure points, and understand how to improve their build process to improve energy efficiency in their homes and meet energy code requirements.

4. Have a knowledge of rebates and incentives available for energy efficient building.
