

Class Descriptions:

Grounding and Bonding:

- Comprehensive class that teaches the fundamentals of grounding and bonding using the National Electrical Code found in article 250. The instructor will teach the theory of the code while referring to code articles in a way the students can understand the concepts found in the code and on job installations.
- Material being used will be Mike Holt's PowerPoints or Ryan Jackson's PowerPoints.

2023 Code Changes:

- Comprehensive class that goes over the code changes found in the 2023 NFPA 70 code book. This class is PowerPoint heavy, but ensures all students understand the new code changes for this code cycle.
- Material being used will be Mike Holt's PowerPoints or Ryan Jackson's PowerPoints or Chad German's personal PowerPoints.

Navigating the National Electrical Code:

- Comprehensive class that brings a more hands on approach to navigating the code book with a PowerPoint background. Students will be able to learn codes that will debunk most myths and help them in their everyday installations or as inspectors.
- Material being used will be Mike Holt's PowerPoints or Ryan Jackson's PowerPoints. (will be classroom activity heavy)
