

USU Eastern Continuing Education

Course Title: International Plumbing Code – Updates Class

Core Hours: 3

Instructor: Thomas Hicken

Objectives:

To improve a participant's understanding of the International Plumbing Code and its applications in plumbing installations.

Description:

This class is focused on understanding the International Plumbing Code. Topics of discussion include current code sections throughout the International Plumbing Code. Code sections are discussed for understanding and with a focus on application of the code in plumbing installations. This course covers a variety of sections from Chapter 1 to Chapter 11.

Outline:

- Introduction of chapter or section from International Plumbing Code
- Discussion of code sections for understanding
- Discussion of applications of the code sections
- Examples of violations of code sections

Delivery Method: Live Instruction – In-person with option for online participation
