Course Title: International Fuel Gas Code – Updates Class

Core Hours: 3

Instructor: Thomas Hicken

Objective:

To improve a participant's understanding of the International Fuel Gas Code and its applications in plumbing installations.

Description:

This class is focused on understanding the International Fuel Gas Code. Topics of discussion include current code sections throughout the International Fuel Gas Code. Code sections are discussed for understanding and with a focus on application of the code in plumbing installations. This course covers a variety of sections from Chapter 1 to Chapter 5.

Outline:

- Introduction of chapter or section from International Fuel Gas Code
- Discussion of code sections for understanding
- Discussion of applications of the code sections
- Examples of violations of code sections

Delivery Method: Live Instruction – In-person with option for online participation
