Class Title: Can AI Make Your Construction Company Better? (Don't Get Left Behind)

Class Overview:

Unlock the power of Artificial Intelligence and transform your construction company! In this engaging 3-hour session, you'll discover how AI is reshaping the construction industry—from streamlining project management to improving communication with project owners, employees, and trade partners. We'll also explore how AI can enhance jobsite safety and support building code compliance. Join us to examine real-world applications of AI in construction, delve into case studies, and gain insights into the competitive advantages AI can bring to your business.

What You'll Learn:

- The basics of AI and its relevance in construction

- How leading construction companies use AI to reduce costs, enhance safety, and optimize project management, and understanding of building code compliance.

- Case studies that show the transformative impact of AI in action

- Practical steps to get started with AI and avoid being left behind in this evolving industry

Why Attend?
Stay ahead of the competition by understanding AI's potential in the construction sector. Whether you're a project manager, contractor, or industry professional, this class offers actionable insights and resources to help you start integrating AI into your company. Don't miss this opportunity to future-proof your business!
