Boiler training **continues** on **Wed., Oct. 14th** with an in-depth exploration of **BOILER SYSTEMS!** This comprehensive **FREE** class will cover everything from the core scientific principles of boiler design to boiler system operation. Complimentary breakfast, beverages, snacks & lunch are provided for all attendees. **Class materials & CE credits** are available with the **VIP upgrade**. **Scan the QR code or simply click this document** to sign up!

This class will require a ticket. General admission tickets are free, however all attendees are required to register and present an E-ticket for admission.

COURSE TOPICS

- **The BEST system layouts to prevent Boiler Short-cycling**
- **Optimize boiler efficiencies from System Return Water Temps**
- **Primary/Secondary and Variable-Primary: Why and Why not?**
- **Providing the best Flow Control for Heating Water circuits**
- **Optimizing energy efficiencies from System Flow Control**
- **We'll test & prove theories using the LIVE-FIRED Boiler Lab!**

It's going to be a great class! **Seating is limited, so please reserve your ticket now!** We look forward to seeing you in the IHS Training Theater at 2310 S 1300 W, West Valley, UT 84119!
