JADELearning
Power Your Career

Course Name	Cost Estimating for Electrical Projects
Credit Hours	4 Hours
Course Description	The course provides guidelines for cost estimators of electrical construction projects, and a look at cost estimating as a career in general. In addition, it provides electrical project and construction managers and superintendents valuable cost estimating knowledge.
Course Objectives	At the completion of this course, students will know fundamentals through advanced techniques used by cost estimators on electrical construction projects. They will also become more familiar with developing cost estimates and submitting bids.
Course Timed Syllabus	Attached
Method of Presentation	This online course uses text and graphics. Multiple choice questions are used to test how well the student understands the material. Each answer choice has a response which tells the student whether the selected answer is correct or not. A running score is displayed so each person can track their progress through the class.
Schedule and Location	This course may be taken at any time at www.JadeLearning.com. The student may sign in and out of the course as many times as needed to complete the course.
Attendance Verification	This course uses personal identification questions to verify attendance. A set of five simple personal ID questions are asked of a licensee before they start a course and then again, randomly, throughout the course (at least one question is asked every 30 minutes). All questions have four preset answer choices. The licensee must answer in the same way as they did at the start of the course to be able to continue training.
	This course also employs an inactivity timer, which will automatically log a licensee out of the training if the system does not sense a mouse click within 30 minutes. At the end of the course, the licensee must affirm their name, that they

are the one who completed the course, and verify that their registration information is correct.

Method of Evaluation
The licensee must complete all 50 multiple choice questions with a score of at least 75% in order to get credit for the course. Question choices are randomized, so each participant will have a unique testing experience. The course is also timed; participants will not get credit until they spend at least 200 active minutes in the course.
