

Keynote Speaker: Dr Erin Rivers

Presentation Title: Blueprints for Success: Innovations and Best Practices in Utah Stormwater Management

Bio Sketch: Dr. Erin Rivers is an assistant professor and the Extension Water Quality Specialist at Utah State University. Erin's research and Extension programs focus on sediment and erosion control, low impact development, and connecting water quality practitioners, elected officials, and citizens to research, resources, and tools for water quality protection. She has spent over a decade researching stormwater practices across the US and is currently developing specific guidance and resources for stormwater management in Utah's arid and semi-arid climate.
