Your Business Operating System: Stop Leaks, Make Customers Happy, Grow Profits

Running a business is hard enough without chasing lost invoices, missed calls, dropped leads, or dead bids.

In this 50-minute crash course, you'll learn how a simple CRM system (e.g. Zoho, HubSpot, Monday, Notion, Trello) can keep your crews busy, your customers happy, and your cash flowing.

We'll cut out the tech jargon and show you practical ways to build a 'business operating system' that runs smoother, wastes less, and grows revenue.

Peter Fuller is the CEO of The Workflow Academy. He and his team have built revenue systems that have transacted >\$500 million over the last 7 years.

Peter also teaches a lot of courses to local students to help them find entry-level careers in sales, marketing, and revenue operations. If you ever want to hire a really smart, hungry junior employee, reach out to Peter and he can connect you with one of his students!

Text him anytime with revenue / business questions at 435-862-0053.
