

Elisa Scherzinger is a Registered Nurse (RN, BSN) bringing over 26 years of comprehensive clinical and healthcare management experience to her safety and first aid instruction. Her extensive medical background is deeply rooted in critical care, high-acuity patient triage, and direct trauma response. She maintains advanced clinical certifications, including Advanced Cardiac Life Support (ACLS) and Basic Life Support (BLS), ensuring her instructional methods are continuously grounded in the highest standards of emergency medical care.

Ms. Scherzinger's practical emergency expertise is highlighted by her nearly eight years as an Emergency Room Nurse at Jordan Valley Hospital, where she managed critical trauma scenarios and assisted with life-saving emergency procedures. Furthermore, her extensive clinical leadership experience, including a decade as a Clinic Manager and roles as a Charge Nurse for the HCA Mountain Division, demonstrates her deep understanding of clinical workflows, patient triage, and strict compliance with OSHA, HIPAA, and other vital safety regulations.

Currently operating as a Corporate Resilience Consultant and specialized healthcare educator, Ms. Scherzinger develops customized, proactive safety training programs for organizations. She is a certified, lead facilitator of engaging CPR, First Aid, and Stop the Bleed instruction. Her extensive frontline ER experience uniquely qualifies her to bridge the gap between clinical medical protocols and practical workplace education, empowering students to respond confidently and correctly during high-stakes medical emergencies.
