WORK EXPERIENCE

SAFETY DEPARTMENT, WORKERS COMPENSATION FUND (WCF), Salt Lake City, Utah

Senior Safety & Loss Prevention Representative

November 1995-Present

Responsibilities: Consult with customers ranging from high profile and complex accounts to small businesses. Directly work with ~300 policyholders. Assist companies with safety program improvements, provide safety and health training as needed. Train employees and management staff on-site. Plan and conduct formal safety seminars throughout the state of Utah as well as some seminars out of state by request. Seminar topics developed and taught include: electrical safety, machine guarding, health care safety, OSHA 10 hour courses for general industry and construction, violence in the workplace, respiratory protection, HAZCOM, controlling workers compensation costs, safety management, accident prevention, lockout/tagout, forklift safety and various others upon request. Receive very favorable feedback from customers on my ability to train and ability to stick within set time limits. Conduct site inspections of workplaces and construction jobsites to point out safety hazards and concerns. Perform ergonomic evaluations to ensure proper set up and use of workstation. Use NIOSH lifting equation and other ergonomic tools to assess needs of the client. Chair WCF's internal safety committee and am responsible for ensuring employee safety and conducting in house training. Work with IT on improving in-house computer systems for reporting and documentation of visits to customers.

Industrial Hygiene experience includes consulting with client to see what needs exist for monitoring. Conduct noise monitoring, silica, dust, and various chemical exposure monitoring for various customers. Regular monitoring performed for specific customers. Consult with local AIHA certified laboratory to ensure valid sample results by using proper sample media and accepted OSHA and NIOSH sampling methods. Wrote reports to document exposure findings.

Other Duties: Assist co-workers with their accounts when needed to ensure best safety service for policyholders. Train new employees. Certified in CPR and First Aid and certified several employees both for clients and WCF employees. Travel out of state to service customers with out of state operations. Work with a variety of industries including construction, manufacturing, restaurant and food production, surface and underground mines, hotel, dairies, farms, office, warehousing, newspaper printing & reporting, university, local government offices, ski resorts, and others.

SAFETY, SALT LAKE ORGANIZING COMMITTEE, Salt Lake City, Utah

Risk Manager and Safety Manager

Winter 2001 – March 2002

Responsibilities: Worked as a member of the Salt Lake Organizing Committee (SLOC) risk management and safety division. Helped with planning and delivery of comprehensive program to control property and workers compensation losses prior to, during, and after the 2002 Winter Olympic Games. Directly supervised SLOC employees and contractors at the Delta Center during planning, build-out, competition, and load-out. Served as safety manager for international test events prior to Olympic games. Duties included training volunteers and staff, incident investigation, documentation of property and injury incidents, coordinating with insurance claims personnel, and worked with media. Directly responsible for safety during the SLOC management of events at the Delta Center. Performed daily site inspections. Worked with local fire authority to ensure compliance with fire and environmental laws. Directly supervised one loss investigator during the Olympic games.

SAFETY, Sturgeon Electric, Highland, Utah

Safety Manager

October 1995

Responsibilities: Safety manager for construction work on Micron jobsite. Ensured safe work practices with all employees. Developed site specific safety manual. Conducted regular site walks to ensure work was being performed in a safe manner. Worked with management to ensure employees worked safe and without injury. Worked with corporate office located in Denver, CO to ensure company wide safety goals were being met.

SAFETY DEPARTMENT, LITTON GUIDANCE AND CONTROL SYSTEMS, Salt Lake City, Utah

Internship – Safety & Industrial Hygiene

February 1995 – October 1995

Responsibilities: Managed HAZCOM program and kept MSDS' current. Performed respirator fit testing for employees. Performed industrial hygiene monitoring for various chemical exposures involved in the processes at Litton. Assisted environmental quality manager with EPA issues as needed. Upgraded safety program.
