## Professional Summary

I started young with hard work ethics and leadership skills. I used to be a bossy kid when we build dirt jumps and tree forts. Mom did not have a man figure at her house. So at a young age i learned how to mow lawns clean yard and many things i did not know much about. It taught me how to figure problems out. Dad was a great teacher and has been an electrician as long as i can remember. He gave me an opportunity as an electrician. With his support and teaching i feel like we have a successful electrical company. Today i am a project manager and working Journeyman electrician. I have learned that it takes hard work and effort to get through the challenges. I like to make opportunities of them. I enjoy teaching what i know to other people. I am excited for this opportunity. I take it as a big compliment that i was asked to try for this teaching position.
