Business Entity List (BEL)

Target Customers

Businesses and citizens interested in generating and customizing lists of businesses in Utah; the legal community, in particular, depends on BEL.

Application Description**Service Overview**

This application allows users to select predefined or customized lists of businesses registered in the State of Utah. As a replacement of a manual process, customers have more flexibility in the information they receive while reducing the time requirement of the agency's staff. Users can employ the following criteria in generating their Business Entity Lists:

- Zip code
- Date of business registration
- NAICS (North American Industry Classification System) Code

Users can pay for their lists with credit cards; the fees are \$5 for the first 200 records and \$.01/record after the first 200. There is no over-the-counter version of BEL. Users receive their lists within 24 hours via email, FTP, or other means.

Benefits to users

Users receive up-to-date information on Utah businesses in a timely, convenient manner.

Application Metrics

BEL is at 100% adoption as there is no other method for obtaining Business Entity Lists.

Past Marketing & Promotional Initiatives

BEL launched October 2000; an updated version of the application launched March 2004. A notice on the Department of Commerce's Web site directs users to the BEL application. UI's Continuing Legal Education (CLE) training covers BEL. No other marketing/promotion is currently planned.
